Java Developer

Senior Java developer with over 8 years of experience in design and development of enterprise software solutions.

Skills Summary

- Oracle Service Oriented Architecture Infrastructure Implementation Certified Expert
- 4 years of experience developing mobile applications for Android using hybrid frameworks like Apache Cordova, Oracle MAF and native Java code as well.
- Solid understanding of Java Enterprise and Spring Framework architecture and design principles.
- Strong ability to hunt and solve bugs
- Develop quality components using Test Driven Development using continuous integration builds
- Agile Software Development Methodologies

Category	Software / Technology
Languages	Java, Python, C#, JavaScript, C++, TypeScript, SQL, BPEL
Cloud	Oracle Cloud, AWS, Red Hat OpenShift
Application Servers	WebLogic, Tomcat, WebSphere, Glassfish
Frameworks	React, NodeJS, Express, Spring Boot, Oracle MAF, JHipster, Ionic, Cordova, Django
Tools	JDeveloper, VS Code, Maven, IntelliJ, SoapUI, Git, Jenkins, JUnit
Database	Oracle, MS SQL Server, MySQL, PostgreSQL, Cassandra

Professional Experience

CBDWEB, MELBOURNE, AU – *Web software solutions provider*
Angular Developer, 08/2018 to 03/2019
development the graphic interface Angular 6 of a booking management solution for ski lodges.

SYWORK S.A.S, BOGOTÁ, CO – *Oracle Gold Partner, JD Edwards Implementation experts*
Software Engineers, 6/2010 to 07/2018
Responsible for participating in different implementation projects of JD Edward, designing integrations of ERP with third-party systems using SOA architecture supported by Oracle SOA Suite as well as development Web and Mobile applications with technologies such as Java Enterprise, SpringBoot, Angular and Apache Cordova.

Selected Accomplishments:

- I designed and developed a cash receipt application, this allows the management of clients, invoices, cash receipts and credit notes fully integrated to JD Edwards ERP. After the implementation of the application, the time spent in reviewing and processing cash receipts was reduced by 90%. I am proud of this project in particular because it had a significant positive impact on the lives of the workers in the client company.
- I proposed the implementation of scrum as an agile methodology for software development processes and customer support in the company.
- I developed multiple mobile applications developed with Android and Oracle MAF framework integrated into JD Edwards through AIS service interface servers.

IOSYS S.A.S, BOGOTÁ, CO – *Mobile software developing, strong digital marketing applications*
Java Developer, 3/2006 to 10/2010
Developed and delivered high-end mobility applications using Java Micro Edition, Symbian, SMS as well as Bluetooth technology for proximity marketing solutions.

Selected Accomplishments:

- I developed an application that allows the realization of surveys through Bluetooth in promotional events
- I developed an application that allows the reception of contents (photos, videos, vCards.) generated by the user from his cell phone through Bluetooth
- I designed and developed a device (hardware and software) that automatically sends multimedia content to cellular phones in the vicinity through a Bluetooth link.
- I lead the development team that created the mobile application of the virtual education platform of the national apprenticeship service SENA (most important technical education institution in Colombia).

Education

SERVICIO NACIONAL DE APRENDIZAJE - SENA, BOGOTÁ, COLOMBIA
Technologist of Computer Network Administration, 04/2006
